DIVISION OF ADMINISTRATION

POLICY NO. 7

EFFECTIVE DATE: March 21, 1996; Revised April 1, 1997,
                     Revised March 16, 1998

SUBJECT: **Year 2000 Compliance**

AUTHORIZATION:

                     _____
                     _____
                     Whitman J. Kling, Jr.
                     Deputy Undersecretary

I.   POLICY:

     It is the policy of the Division of Administration, as
     required by Executive Orders MJF 96-50 as amended, that
     all software and equipment procured by the Division must
     be Year 2000 compliant. The systems must not produce
     incorrect results prior to, during, or after the Year
     2000 as a result of processing, storing, or displaying
     date data.

II. PURPOSE:

     To define Year 2000 compliance, establish criteria for
     the use of dates within information systems, and set
     forth related rules governing the acquisition of data
     processing equipment, software, firmware products, data
     processing services and/or custom computer items or
     services.

III. APPLICABILITY:

     This policy shall be applicable to all employees in all
     sections of the Division of Administration, both general
     appropriation and ancillary appropriations.

All hardware and software, firmware products, information systems or computer items or services, must be Year 2000 compliant at the date of acquisition or achieve Year 2000 compliancy by an agreed upon date at no additional cost.

This policy applies to all information systems within the Division of Administration, including hardware, software and applications systems on mainframes, servers, and personal computers.

IV. DEFINITIONS:

Year 2000 compliant means meeting the following criteria:

1) All dates stored on external media shall be stored in a standard date format that includes a 4 digit year representing century and year (CCYY),

2) The system will not end abnormally or give incorrect results during operation prior to, during or after the Year 2000 as a result of processing, storing, or displaying date data.

3) Any date calculation software provided must produce correct results processing date data within and between the twentieth and twenty-first centuries. This would include any software provided for: computation of date range (time) periods, computation of future dates, leap year determinations, day-of-week determinations, day-of-year determinations, collating sequences used in sorts and merges, comparisons determining which date is earlier or later, and any other usual manipulations of date data.

V.   PROCEDURE:

Vendors wishing to sell software, data processing services, or computer systems to the Division of Administration shall be required to certify that their products are Year 2000 compliant. If the vendor cannot provide that certification, they shall state the date on which the necessary upgrades will be made available to the state at no additional cost. In no case shall this date be later than June 30, 1999. The attached sample

Year 2000 compliance clauses or equivalent language shall be included in any contract for information systems entered into by the Division of Administration.

VI. RESPONSIBILITY:

The Office of Information Services is responsible for:

Answering technical questions relating to this policy and interpreting Year 2000 compliance

Working with the Division of Administration sections to assess the impact of the Year 2000 on their data processing systems and software.

Coordinating required updates to the Division of Administration developed software.

Evaluating Year 2000 compliance on the Division of Administration mainframe and servers, including hardware, operating system and system utilities; identifying the necessary initiatives; requesting sufficient resources; and scheduling approved system upgrades or replacement.

Each section head is responsible for:

Complying with the provisions and spirit of this policy, and

Communicating this policy and all updates to all employees in his/her section, and

Enforcing this policy, and

Ensuring that Year 2000 compliance criteria are incorporated into all solicitations and contracts for data processing systems, software or services.

Working with the Office of Information Services staff to assess the impact of the Year 2000 on their data processing systems and software.

Justifying any additional resources required to

assure Year 2000 compliance and participating in development of associated budget request. Ancillary sections will be required to budget and fund any associated hardware and software acquisitions.

Scheduling the upgrade or replacement of all non-compliant systems to ensure Year 2000 compliance. The associated resources, work plans, and funding must be scheduled to ensure completion on or before June 30, 1999.

VI.   EXCLUSIONS:

The provisions of this policy may be waived for acquisitions less than $1000, or as determined by the Deputy Undersecretary in writing.

VII. VIOLATIONS:

Employees found to have violated this policy may be subject to disciplinary action up to and including termination.

Sample contract language

Year 2000 compliance

Vendor certifies that the products acquired under this
contract presently meet all the Year 2000 compliance criteria
specified by the State, or warrants that it shall achieve Year
2000 compliancy by _____, 199___. Any upgrades
needed to achieve this compliancy shall be provided to the
State at no extra cost and shall be provided before or by the
above stated date. Year 2000 compliancy is defined as follows:

    1) All dates stored by the product on external media
    shall be stored in a standard date format that includes a
    4 digit year representing century and year (CCYY),

    2) The product will not end abnormally or give incorrect
    results during operation prior to, during or after the
    Year 2000 as a result of processing, storing, or
    displaying date data.

    3) Any date calculation software provided by the vendor
    must produce correct results processing date data within
    and between the twentieth and twenty-first centuries.
    This would include any software provided for: computation
    of date range (time) periods, computation of future
    dates, leap year determinations, day-of-week
    determinations, day-of-year determinations, collating
    sequences used in sorts and merges, comparisons
    determining which date is earlier or later, and any other
    usual manipulations of date data.

    4) The term "product" as used herein refer to those
    goods or services supplied by the Vendor under this
    contract. The Vendor shall not be held responsible for
    errors introduced by failure of other products that may
    exchange data with Vendor=s product.

Notwithstanding any other provisions to the contrary regarding
warranties or remedies for breach, the remedies available to
the State shall include forthwith repair or replacement of any
provided product whose non-compliance is discovered and
reported by the State to the Vendor.
